Accelerating Global Digital Literacy

Project Title	Accelerating Global Digital Literacy
Project Summary	Conducting research, identifying partnerships, material synthesis, etc. to highlight promising digital literacy interventions for application in low-resource, developing country context and turning consolidated findings into concise print- and web-friendly materials for dissemination.
Country	United States

Project Description

Highly motivated and energetic interns will be selected to conduct material review, analysis, synthesis, and new content creation for how digital literacy interventions can reach and support learners in formal and non-formal educational settings in developing countries. You'll have the opportunity to closely with international subject matter specialists at USAID, with consortia members of the mEducation Alliance, and with other international organizations focused on technology, education, and digital literacy..

Required Skills or Interests
